Aspiring AI and Human-Computer Interaction engineer with a background in Psychology and Information Studies, building intelligent systems that improve how people interact with technology. Experienced in AI, cloud computing, DevOps, and software engineering through self-directed learning and hands-on projects.

## Education

### University of Ghana (GPA: 3.1)

Legon GA, Ghana

BSc Psychology and Information Studies

2022 – 2026

- Relevant Courses: Statistics for Psychologists, Psychology for Personality, Information Sources, Records Management, Public Relations, Principles of Management, Telecommunications and Information Network, Organizational Psychology, Information Storage and Retrieval

### Bishop Herman College

Kpando VR, Ghana

General Arts

2011 – 2014

- Relevant Courses: Economics, Elective Mathematics, Geography, Government

## Work Experience

### Solutions Technologies

Madina GA, Ghana

Technical Lead (Part-time)

2020 – 2022

- Led the design, implementation, and deployment of ICT and telecommunications solutions across multiple regions in the country.
- Supervised the end-to-end installation and configuration of VSAT systems, wireless and wired networks, and satellite communication solutions.
- Managed project teams and coordinated with clients and partners to deliver high-quality, reliable, and scalable connectivity solutions.
- Conducted troubleshooting, maintenance, and optimization to ensure network performance met customer satisfaction and business needs.

### ALX Africa

Remote

Intern (IT Support)

2019–2020

- Helped learners and staff resolve issues with logging in, accessing course materials, or navigating ALX's platforms.
- Diagnosed and fixed errors like page loading problems, broken links, and user interface glitches.
- Kept an eye on the platform's performance and report any outages or major bugs.
- Worked with the product or engineering teams to escalate bigger technical problems that need fixing beyond basic troubleshooting.

### Joetech IT solutions

Pokuase GA, Ghana

IT Technician

2015 – 2017

- Diagnosed and repaired hardware issues, including disassembling and reassembling laptops and desktop computers to replace or fix faulty components.
- Performed software troubleshooting, including operating system reinstallation, application setup, and driver configuration.

## Projects

### Intelligent Systems

Ga-ASR

(Supervised by Professor Isaac Wiafe; Human-Computer Interaction Lab, UG)

- Developed a Transformer-based automatic speech recognition (ASR) system for the Ga language using OpenAI's Whisper architecture.
- Addresses the lack of speech-to-text support for underrepresented African languages, improving accessibility to voice technologies.

FAQ-Knowledge-Base

(Supervised by Dr. Simon-Peter Kafui Aheto; Information Studies Department, UG)

- Designed and developed an HCI platform comparing FAQ pages, retrieval-based chatbots, and AI chatbots using a common knowledge base.

- Evaluates which interface enables students to access university information more efficiently, accurately, and with lower cognitive effort.

#### *Cloud Infrastructure & DevOps*

##### *(UDEMY & JOMACS projects)*

- Built and deployed a multi-tier VProfile application on AWS.
- Implemented CI/CD pipelines using Jenkins, Nexus, SonarQube, Ansible, and Slack.
- Containerized applications with Docker and Docker Compose.
- Deployed scalable Kubernetes workloads using Terraform and GitOps principles.

## **Psychology**

#### *Investigating Employer-Employee Relations and Domestic Life (Class Project)*

- Designed and administered questionnaires to employees in formal organizations.
- Analyzed data to identify patterns and insights regarding work-life balance and employee well-being.

## **Information Studies**

#### *Information Sources Analysis (Class Project)*

- Conducted research on globally used reference books, examining their origins, publication history, and practical applications.
- Compiled a comprehensive list of reference works including The World Almanac and Encyclopedia Britannica for an academic presentation.

#### *Public Relations Campaign Development (Class Project)*

- Collaborated in a team to design a detailed PR plan tailored for an archive or library.
- Delivered the campaign through a PowerPoint presentation and a video, demonstrating skills in content development and public speaking.

## **Certifications**

---

Devops Beginners to Advanced- [UDEMY]

June 2026

Devops Engineering [JOMACS]

January 2025

AI Essentials [ALX]

September 2022

## **Skills**

---

### **Technical Skills**

- Cloud Computing: AWS (EC2, S3, RDS, Route 53, Elastic Cache, Beanstalk, Amazon MQ) Proficient
- DevOps Tools: Jenkins, Nexus, SonarQube, Ansible, GitOps
- Containerization: Docker, Docker Compose, Kubernetes, Terraform
- Programming Languages: Basic scripting in Bash or Python (if applicable)
- Technical Support: Troubleshooting, resolving user issues, performance monitoring

### **Software Skills**

- Proficient in Microsoft Suite (Word Document, Excel, PowerPoint)
- Proficient in Google Suite (Google Docs, Sheets, Slides)
- Proficient in Adobe Creative Cloud (Premiere Pro, Illustrator and Photoshop to create excellent graphics)

### **Work Related Skills**

- Project Management: Collaboration, team coordination, and process optimization
- Research and Analysis: Data collection, data analysis, report preparation
- Communication: Clear documentation, public speaking, presentation skills
- Soft Skills: Problem-solving, adaptability, teamwork

## **Referees**

---

### **List of Referees**

- Mr. Emmanuel Pobee, CEO at Solution Technologies, [alam@binghamton.edu](mailto:alam@binghamton.edu)
- Prof. Isaac Wiafe, Head of the Human-Computer Interaction Lab at UG, [iwiafe@ug.edu.gh](mailto:iwiafe@ug.edu.gh)
- Dr. Eric Delle, Undergraduate Lecturer at UG [edelle@ug.edu.gh](mailto:edelle@ug.edu.gh)
